

I am concerned that changing the rules for low power fm transmission could eliminate service to K-LOVE in my area and other areas that I travel in. K-LOVE provides radio service that is supportive of my personal beliefs, a service not available on most other stations. If K-LOVE service is discontinued there will be little or no provision for listeners like me in the areas where I and my family and others live and work. We did not have this type of station previously and listen to it often now that we have it available. If the service for K-LOVE is discontinued, there will be no opportunity for people to listen to radio programming that promotes co-operation, peaceful and law-abiding lifestyle, and provides a radio musical content not otherwise available. I urge you to not cause a change that would eliminate this service provided by K-LOVE.
